Orchest Automation Joins Forces with Ni2

to Provide Network Inventory Management and Service Feasibility for Precise Quoting

Weston, FL, USA – October XX, 2024 – Orchest Automation, the new software company of Orchest Technologies, has announced a strategic partnership with Ni2, a leading provider of network inventory management solutions, to deliver accurate Network Inventory Management and comprehensive Service Feasibility Analysis for network connectivity and data center quoting.

This collaboration will integrate the Orchest platform with the Ni2 platform, enabling customers to utilize a robust quoting tool based on precise asset inventory. This integration ensures the most accurate technical feasibility analysis and service pricing for network solutions, data center services, and beyond.

By leveraging Ni2's Inventory Management and Orchest's Feasibility Analysis Algorithm, carriers and enterprises will achieve unprecedented levels of efficiency in their operations. The combination of Ni2's OSS capabilities with Orchest's BSS functionalities will streamline business processes, enhance customer support, and enable precise management of network infrastructure assets. Both companies have established an API that connects the Ni2 and Orchest platforms seamlessly.

"This partnership with Ni2 is crucial for Orchest. Orchestration relies on accurate data; by utilizing Ni2's Inventory Management, we can ensure 100% accuracy while implementing our Technical Feasibility Analysis Algorithm during the quoting process for network and data center solutions," said Jeremy Villalobos, CEO of Orchest Automation.

❯ About Orchest Automation:

Orchest Automation is a software company and part of the Orchest Technologies group, pioneering fully automated end-to-end customer experiences for network providers across 17 countries. Over the past five years, it has redefined network orchestration by providing a holistic approach to network intelligence, transparency, groundbreaking process automation, and world-class customer engagement.
